

How MediMobile compares to your current solution

Feature	Your current system	MediMobile
Speed	Slower workflow reliant on manual processes	Fastest real-time coding with AI automation
Accuracy	Limited to manual coding and basic documentation review	AI-powered coding with real-time validation for highest accuracy
AI/Automation	No AI or automation	Proven fully autonomous AI coding system
Documentation Use	Stores documentation but does not attach it to charges	Integrates and attaches documentation directly to the encounter in one singular system
MDM Feed Processing	Does not process MDM feeds	Actively processes MDM feeds for complete, accurate charge generation from documentation
Coder Workload	Fully reliant on human coders	Reduces coder workload by up to 75% - freeing up time
Revenue Capture	Prone to missed charges and delays	Real-time capture of all charges with built-in charge integrity tools
Claim Denials	Denials still occur due to manual errors and missing data	Significantly reduced through AI validation and real-time flagging
Development & Support	Slower to innovate; limited adaptability	Dedicated development team constantly improving features and capabilities
EMR Integration	Basic integration; limited data connectivity	Seamless integration with EMRs and real-time ADT/MDM feeds
